(54) Title: APPARATUS AND METHOD FOR CREATING 3-DIMENSIONAL IMAGE

(57) Abstract: The present invention relates to an apparatus and method for generating 3-dimensional image, which comprises a image photographing part composed of a camera part, a turn table part, a photographing angle adjustment part, a X-axis adjustment part, and a Y-axis adjustment part; a image photographing control part that creates movement control signals, transmits to said image photographing part, and receives plural digital images photographed by said camera part; a 3-dimensional image generating part that creates 3 dimensional images by using said plural digital images; and a storage part that stores said plural digital images and said 3-dimensional images. The present invention thus provides 3-dimensional images to consumers to see a certain product with its actual view by rotating at a wanted angle.
